

NEVEN ALI

Frontend Engineer • React • TypeScript • Next.js

Damascus, Syria | +963 937 395 586 | nevenali.contact@gmail.com | linkedin.com/in/neven-a-ali

PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of experience and 10+ production projects built with React, TypeScript and Next.js, spanning landing pages, corporate websites, admin dashboards, management systems and B2B platforms. I care about how code reads as much as how it runs: consistent, well-structured components that teammates can understand and extend without friction. A background in QA and an engineering degree from HIAST make precision a habit, from pixel-accurate design implementation to the small details others tend to miss.

WORK EXPERIENCE

Software Engineer | Frontend Developer • Pharaon Group (Ultrawares)

Free Zone, Syria | Mar 2025 – Present

- Set up and built the frontend for SAWA's website and subscriber self-service dashboard, set up and built most of the Glovent website, built the Askon Syria landing page and contributed to the Texpo exhibition website, all with Next.js.
- Built the admin panel of Askonnect, a members-only B2B trading platform, and contributed to its real-time messaging features over WebSocket.
- Built the admin and patient management modules of Denta Plans, a dental clinic management platform, contributed to its diagnosis and treatment planning features and co-developed its landing page. Also contributed to Pyramid, the company's internal project management platform.
- Provided frontend support for Like TV, a Syrian TV and video-on-demand service, and Like Blue, including bug fixes and redesigns of selected pages in their admin and billing dashboards.

Next.js • React • TypeScript • Redux • WebSocket • REST APIs • TailwindCSS • Mantine • Material UI

Frontend Developer • FSIT

Damascus, Syria (Remote) | Nov 2023 – Oct 2024

- Developed and maintained dynamic user interfaces with React, JavaScript, HTML and CSS.
- Worked closely with UI/UX designers and backend developers to integrate frontend components into the application architecture.
- Built responsive layouts that work consistently across devices and screen sizes.

Manual QA Tester • Yolo GmbH

Germany (Remote) | Jul 2022 – Apr 2023

- Wrote comprehensive test cases and ran manual testing to verify features against business requirements and user experience goals.
- Worked with cross-functional teams to define and apply QA practices across the product.
- Investigated customer-reported production issues and helped resolve them quickly to minimize downtime.

FEATURED PROJECTS

Askonnect – B2B Trading Platform & Admin Panel

askonnect.co

- **Problem:** ASKON needed a members-only B2B platform where suppliers and buyers trade under association oversight, with administrators able to manage members, monitor trade activity and resolve disputes.
- **Approach:** Built the admin panel: admins and role-based permissions, users and companies, activation codes, trade requests, tenders and categories, plus a moderation area for chat reports, contract complaints and evaluation reports with status-based review workflows. Contributed to the platform's real-time messaging over WebSocket.
- **Outcome:** Live, giving the association's admins one place to manage members and handle reports and complaints.

React • TypeScript • Redux • Material UI (admin panel) • Mantine (platform) • WebSocket • REST APIs

Denta Plans – Dental Clinic Management Platform

app.denta-plans.com • denta-plans.com

- **Problem:** Dental clinics needed one platform to manage patients and staff, build diagnoses and treatment plans, and present those plans clearly to patients.
- **Approach:** Owned the admin and patient management modules, including the flows for adding new patients and admins, and contributed to the diagnosis and treatment planning modules. Co-developed the product's public landing page with another developer.

- **Outcome:** Live as a commercial platform offered to dental clinics, alongside its public marketing site.

React · TypeScript · Material UI · REST APIs · Next.js (landing page)

Pyramid – Project Management Platform · Jul 2025 – Apr 2026

pyramid.pharaon-group.com

- **Problem:** Agile teams at Pharaon Group needed one place for sprint planning, backlog management and cross-team visibility, without the overhead of a heavyweight third-party tool.
- **Approach:** Contributed to drag-and-drop backlog and sprint boards with optimistic UI updates, and to role-based access (admin, PM, member) handled at the routing and component level, keeping permission logic out of business components.
- **Outcome:** In daily internal use to manage the company's projects and tasks.

React · TypeScript · Redux · REST APIs

SAWA – ISP Website & Subscriber Dashboard

sawaisp.sy

- **Problem:** SAWA, a nationwide Syrian internet provider, needed a public site presenting its packages, offers and points of sale, plus a self-service area where subscribers can follow everything about their accounts.
- **Approach:** Set up the project and built the Next.js frontend, including a structured package catalog (ADSL, wireless, business internet, IPTV, hosting), an interactive points-of-sale finder across governorates, and a subscriber dashboard for account and subscription details, monthly data usage, login session history, financial statements, support ticket follow-ups, and subscription renewal and top-ups, with search and date filters across its records.
- **Outcome:** Live as SAWA's official website.

Next.js · React · TypeScript · i18n

Glovent – Event Management Agency Website

glovent-events.com

- **Problem:** Glovent, an event agency with 20+ years and 900+ delivered events, needed a site that could credibly represent institutional and government-scale work, where a generic template would undercut trust.
- **Approach:** Set up the project and built most of the frontend, structuring components and i18n so Arabic and English ship from one codebase without duplicated layout logic, with consistent visuals across six service pages.
- **Outcome:** Live in Arabic and English as the agency's main website.

Next.js · React · TypeScript · TailwindCSS · i18n

OTHER PROJECTS

- **Texpo** – Website for an online technology exhibition in Damascus (contributor) · texpo-exhibition.com
- **Askon Syria** – Company landing page · askon-syria.com
- **Like TV** – Admin and billing dashboards for a Syrian TV and VOD service (support and page redesigns) · likesyria.sy
- **Clinictify** – Medical center management system with patient and doctor accounts, appointments and medical records (2021) · clinictify.com
- **Softphone (Graduation Project, HIAST)** – React UI for a softphone connected to an Asterisk server over the IAX protocol, with a C# backend (2020)

EDUCATION

Bachelor of Science in Communication Engineering

Sep 2015 – Sep 2020

Higher Institute for Applied Sciences and Technology (HIAST), Damascus

TECHNICAL SKILLS

Languages	JavaScript (ES6+) · TypeScript · HTML5 · CSS3
Frameworks	React · Next.js
UI Libraries	Material UI · Mantine · TailwindCSS
State & Data	Redux · REST APIs · WebSocket
Practices	i18n / RTL · Responsive Design · Manual QA & Test Case Design
Tools	Git · Figma · Postman · VS Code
